

DPS Mirror is a broad range of large-format mirror modules. The DPS Mirror panel is composed of a PVC polymer shrink film with aluminium coating, stretched on a robust aluminium frame. All that is covered with a black membrane for protection purposes.

DPS Mirror is a perfect mirror with the optical reflection of 95%. It was created to replace the well-known hazardous, heavy and size-limited mirrors.

The DPS module is light as it weighs approx. 1.5 kg/m<sup>2</sup> and presents a perfect mirror.

All DPS products are tested for the reaction to fire and comply with the European construction safety standards.

It is a perfect decorative accent which complements our collection. With the versatile fields of application it can be used in stores, galleries, theatres, sports halls, exhibitions. DPS Mirror is also a perfect decoration for private spaces.

## colors

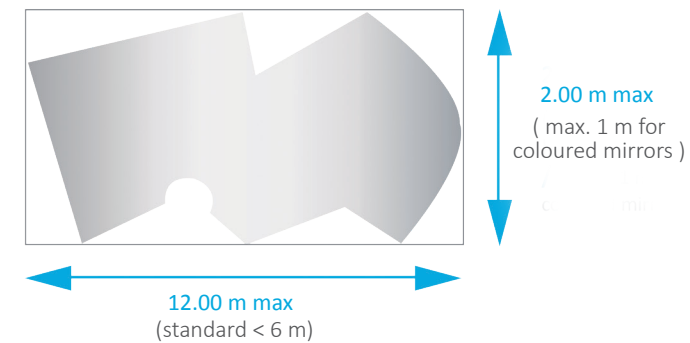

The DPS Mirror panels will be available in a wide choice of colours comprising 12 different shades. Flagship product will be the silver panel i.e. the one which imitates a mirror, with the only difference, as compared to other products available in the market, being that our technology has much more advantages.

## a mirror ceiling stretched on an aluminium frame

## size and shape

## advantages

- weight: 1,5 kg / m<sup>2</sup>
- size: min. 55 x 55 cm, max. up to 2 x 12 m
- safety, non-cutting
- easy installation
- printing possibility
- perfect mirror - ordinary mirror is a large glass panel with a metallic layer underneath which forms the mirror
- no deformations
- possibility of perforation
- made to order
- one-way mirror effect possible
